

DX168

REMOTE I/O EXPANDER

The DX168 is a rugged portable or rackmount expander for adding extra inputs & outputs to a dLive or SQ system.

Each DX168 features 16 high end, low noise 96khz microphone preamps with independent phantom power LED indicators, accompanied by 8 analogue line outputs on XLR.

A 4U rack mounting kit is available for industry standard 19" rack mounting.

The DX168 can be connected in redundant or cascade mode to fit any situation. The connection can be run over an L2 VLAN. A unique auto firmware matching feature keeps the DX168 in sync with the rest of the dLive or SQ system.

DX168 is compatible with the dLive and SQ series.

Key Features

- 16 High end, low noise preamps
- Independent 48v indicator
- 96khz
- Auto firmware matching
- Ethernet L2 compatible

Benefits

- Rack mount (optional kit)
- Up to 46 expanders in a system
- Can be connected thru a VLAN
- Can live on the building IT network
- No noise (fanless)
